EARNIE BUSINESS

EARNIE BUSINESS IS AN IDEAL PAYROLL FOR GROWING COMPANIES

With many years in payroll and thousands of companies using EARNIE software, Keysolve offers peace of mind for all companies looking for the right payroll solution. Legislation is becoming more complex and it is sometimes difficult for even the most experienced payroll professional to keep up-to-date.

Finding your way round the system is easy, even when you don't use it every day, but we also offer plenty of back-up support should you need it.

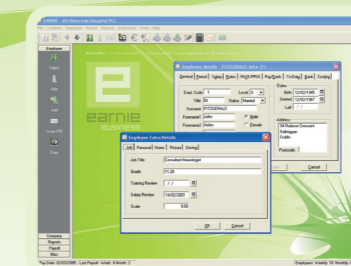

PAYROLL FOR GROWING COMPANIES

EARNIE business is an ideal solution for growing companies. It is a comprehensive yet straightforward payroll system that offers lots of useful features. Perfect for companies with up to 100 employees looking to increase functionality without spending a fortune.

But it doesn't stop there: when your business grows, we can grow with you. Once you employ more than 100 employees you can upgrade seamlessly to one of our larger systems without losing any payroll data.

FLEXIBLE TO FIT YOUR NEEDS

- An absence diary to hold information – such as holidays, set reminders e.g. to pay a Christmas bonus, or set an 'Action' to happen at a future date e.g. salary increase or change a tax credit / cut-off.
- Create reports to give you a clear picture of your payroll or simply select from a large pre-written collection. EARNIE business can store up to 9 years of payroll data so you have the flexibility to decide the information important to you.
- Set up items such as bonuses, pensions and loans as well as extra ones to handle your particular company requirements in a matter of minutes with an easy-to-use wizard. If, for example, you want to pay an employee a fixed amount of net pay, EARNIE will calculate the gross payment for you.

We also understand that you may want to record certain things which are specific to your company so there are up to 25 user-defined fields to allow you to do just that.
